Seeking Software Engineer role.

Experience

Paytm, Software Engineer | .NET, Next.js, React, Redis, Kafka

July 2025 - Present

- Engineered a **real-time MIS analytics dashboard** processing **millions of transactions daily**, improving monitoring efficiency by **90%** and enabling faster anomaly detection.
- Developed scalable **frontend architecture** using **React.js & TypeScript**, enhancing data visualization and increasing stakeholder decision-making speed by **2x**.
- Optimized **SQL queries and stored procedures**, achieving **2x performance improvement** and reducing **API latency by 35%**.
- Pioneered the development of **server-sent events** for **real-time data streaming** to the analytics platform, decreasing data discrepancies by **45%** and **improving dashboard reliability**.

Smart Energy Water, Product Engineer Intern | **Noida**

Sep 2024 - Dec-2024

- Fabricated a **ZIP code validation feature** for the WE3 Summit website, enhancing user input accuracy by **30%**.
- Deployed a **user registration module** with sign-up and sign-in functionality, improving account creation efficiency by **25%**.
- Integrated **payment portfolio code** into the portal system, resolving **200+ code conflicts**, ensuring seamless functionality and stability.

MindGrades (EdTech Startup), Frontend Developer Intern | **Remote**

Sep 2024 - Sep 2024

- Introduced a secure and efficient **login feature**, reducing authentication errors by **20%** and improving user experience.
- Created **reusable component code** for the website, increasing development efficiency by **30%** across the project.
- Crafted and deployed a **modal feature** to enhance user interaction and simplify workflow management.
- Optimized **community post performance** by reducing API fetch times by **40%**, improving page load speeds and responsiveness.

Education

Bachelor Of Computer Application (BCA) - 9.4 current CGPA, *Maharaja surajmal institute* | Delhi

2022-2025

Achievements: Selected for GOVT IT internship @ New Delhi Municipal Council (NDMC) | Microsoft Learn Student Ambassador (MLSA)
3 x participated in Hackathon (SIH, FINXTHON, CODE4CAUSE) | Solved 200+ DSA problem on Leetcode

Skills

Languages: JavaScript, TypeScript, Java, C/C++, Python, SQL

• **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS

• **Backend:** Node.js, Express.js, .NET, GraphQL

• **Databases:** MongoDB, MySQL

• **Tools & Technologies:** Redis, Kafka, RabbitMQ, Git, Linux, Azure Data Studio

• **Others:** System Design, REST APIs, Microservices, Data Structures & Algorithms

Projects

DevBoard- AI-Powered Developer Productivity Dashboard

Dec 2024 - Mar 2025

Live | Code

- Orchestrated **real-time event pipelines** using **Kafka**, processing **1M+** events with **<200ms latency**.
- Reduced **API response time by 40%** using **Redis caching**, optimizing third-party API calls.

ClawBot v2.0 — Autonomous AI Developer Agent

Jan 2026 - Feb 2026

Live | Code

- Cultured a fully **autonomous AI developer agent** capable of executing end-to-end programming tasks using a **Plan → Execute → Observe → Retry** loop, reducing manual intervention by **80%**
- Developed **local LLM-powered reasoning system** using **Ollama**, eliminating dependency on paid APIs and reducing operational cost by **100%**
- Devised **multi-step task planning engine**, enabling execution of **10+ sequential actions** per task with robust error recovery
- Architected **persistent memory system**, storing **1000+ tasks** and project states, improving context retention and task continuity

YC Directory - Space For Entrepreneur & Startup

Feb 2024 - Mar 2024

Live | Code

- Simulated a project showcasing advanced features of **Next.js 15**, improving performance and developer experience.
- Integrated **Next.js Forms** for seamless client-side submissions, reducing submission errors by **20%**.
- Leveraged **Server Component HMR Cache**, increasing development speed by **50%**.
